PROJECTS

Admin Panel Management
Handle data coming to backend panel
- **Description:** Developed a dynamic and user-friendly admin panel to manage and display data submitted by customers from the front end. The project includes full CRUD (Create, Read, Update, Delete) operations with data handle in the backend using MySQL and PHP.
- **Technologies**: HTML, CSS, JavaScript, Bootstrap, MySQL, PHP

Personal Portfolio Built with React
- **Description:** My personal portfolio provides an overview of my skills and projects. This project demonstrates my ability to create dynamic and user-friendly interfaces for efficient data management.
- **Technologies:** React, HTML, CSS, JavaScript, Tailwind CSS

Registration Form with jQuery Validation
- **Description:** Developed a responsive registration form using HTML, CSS, and jQuery for client-side validation. The form includes fields for name, username, email, password, and confirm password, ensuring all fields are filled and passwords match before submission.
- **Technologies:** HTML, CSS, jQuery
